Chateau de Bagatelle

On a wager with Marie Antoinette, in 1780, the Comte d'Artois (later Charles X, the second King of the Restoration), built an entrancing little chateau, with its charming gardens in the incredibly brief time of 64 days. The outlay was three million francs.

"C'est magnifique!", cried Marie Antoinette, on catching her first glimpse of the beauty spot which became an enduring reminder of her wager.

"Mais, non, c'est une bagatelle" answered the gallant Comte d'Artois. So in this romantic manner the name "Bagatelle" originated.

The gardens of the Chateau de Bagatelle, near Paris, are now used as testing grounds to determine the value of new roses, sent from all parts of the world. A most interesting place! So is the Bagatelle Nursery with its specimen evergreens, ornamental trees, Rhododendrons and new Azaleas. A cordial welcome awaits you.

Azalea Kaempferi Hybrids

Azalea Kaempferi Hybrids are gaining in popularity every year. They inherited the vertical growth from Azalea Kaempferi, one of the parents and also its hardiness. Both qualities make them very desirable for landscape plantings. The delicate pastel colored flowers are large and do not burn even in the full sun. They are also desirable for forcing; at three consecutive Flower Shows in New York, they were awarded Gold Medals. They were also awarded Gold Medals in various European cities.

OUTSTANDING FEATURES ARE:

1. Thorough hardiness (16 degree below zero).
2. Rapid growth.
3. Extreme floriferousness.
4. Large flowers (some measure 2½ in. across).

Carmen

Delicate rose like Moss Pink (Phlox subulata).

Fedora

Rose, like the outer petals of the Bleeding Heart. Very large flowers.

Louise

Carmine, a lighter tint than that of Azalea Hinodegiri.

Othello

Salmon pink, the colour of the open flower of the rose Mme. Edouard Herriot.

Malus

Flowering Crabs are the rivals of Flowering Cherries. In fact, they are considered by many to excell them in beauty. They flower most profusely in a great variety of color, pure white, pink, white and pink, carmine, while in the fall, lasting until winter, the trees are covered with fruit, small tiny apples, yellow, orange, red and carmine, according to varieties.

MALUS arnoldiana

Flowers semi double, coral pink changing to white, fruit yellow.

— **eleyi**

Light purple foliage, later turning to green. Single, carmine flowers and carmine fruit in great abundance. The little apples $\frac{3}{4}$ in. across, make an excellent, beautifully colored jelly.

— **floribunda**

Bright pink buds, the open, single flowers white, forming a beautiful contrast of colors. Reddish yellow fruit.

— **halliana parkmanni**

Double, bright rose flowers, fruit purplish red.

— **niedzwetzkyana**

Young foliage tinged purple, later turning to green. Flowers single, carmine. Fruit carmine, much larger than the fruit of the other varieties but not so abundant.

— **theifera**

Exceedingly floriferous, flowers delicate rose, changing to blush white; fruit greenish yellow.

Koster Blue Spruce

All our Koster Blue Spruce are grafted, the cions used are selected with the greatest care from plants we know to be true "Kosters". Even our very young plants are "staked" in order to secure well shaped plants with perfect leaders.

It was our Mr. Koster who, in 1886, grafted the first five cions of the Koster Blue Spruce which originated in his father's nursery.

Rhododendron Hybrids

The Bagatelle Nursery makes a specialty of growing Rhododendrons and have first class facilities to do so. Experiments, at great cost, have been made in the last five years to test hardiness as for outside planting in the vicinity of New York and Boston; only the hardiest varieties should be chosen.

Varieties marked * need winter protection.

We have indicated behind each variety the maximum height available from 12 inches up.

Hybrid Seedlings

We have a considerable quantity of Rhododendrons grown from seed. The very severe winters of 1933-36 have weeded out those that were not hardy. The colors are very good but we cannot guarantee any specific color.

Native Varieties

The Native Rhododendron we offer are *nursery grown*; they are far superior to collected stock. We will be very glad to send you prices for collected plants in carload lots either of one variety of one size or mixed varieties from 1½ to 5 ft.

Carolinianum

Carolina Rhododendron

Compact clusters of very fine clear pink flowers blooming profusely the latter part of May. It is a compact grower with good foliage though considerably more narrow than the foliage of the Hybrids.
